G.A.L. secures files, communications, Internet Connectivity

The G.A.L. Advantage:

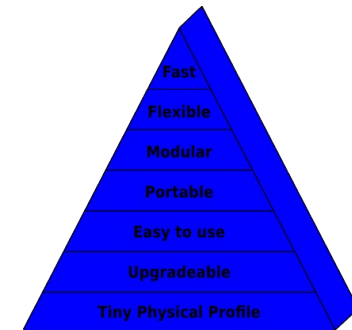

Engineered for Protection

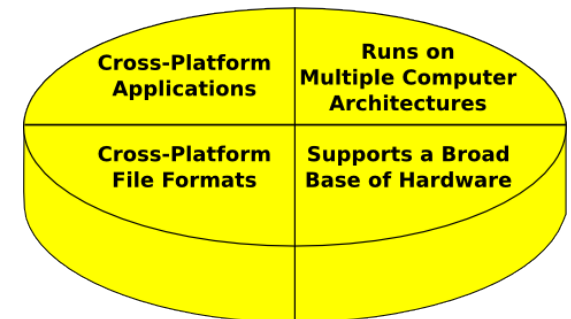

Privacy and Anonymity Protection

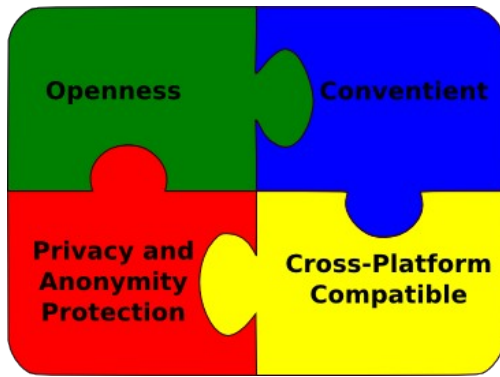

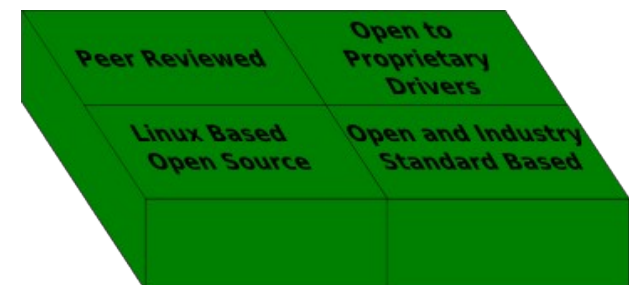

Convenient

Compatible

Openness

Since G.A.L. was designed to run from a USB flash device without the user installing any actual components on the PC, you don't have to lug around your laptop, you just plug in your G.A.L. Device, boot the PC, and you're off in your own, familiar and customized desktop environment. How convenient is that?

What G.A.L. can do for you.

Feel Secure

- Provides Privacy and Anonymity
- Provides encrypted storage and communication.

Excellent Protected portability and availability

- Small USB or DVD profile

Be productive where ever there is an available computer

- Always feel prepared by having all of "your stuff"

GAL Software

GAL-Kit
